

Pressure Transducers

Ultrahigh-Purity

PTU Series

- Single-end, flow-through, and modular surface-mount models
- Positive pressure ranges to 5000 psig, 400 bar, and 40 MPa; compound pressure ranges to 500 psig, 250 bar, and 25 MPa
- Excellent long-term stability and repeatability for reliability and low maintenance
- 316L VIM-VAR stainless steel and Elgiloy® wetted components
- VCR® metal gasket face seal, Micro-Fit® weld tee, tube butt weld, and modular surface-mount end connections

The Swagelok® PTU series pressure transducer provides electronic monitoring of system pressure for ultrahigh-purity applications. The PTU series pressure transducer is available with a variety of pressure ranges, process connections, electrical connectors, and output signals. The configurable and renewable electronics allow the conversion of the output signal from voltage (dc) to milliamps (mA) without removing the unit from the system. In addition, a direct-mount digital display indicator is available to provide a visual display.

Features

- Metal thin-film sensing technology, which consists of a metal thin film resistor bridge on an Elgiloy diaphragm, enables PTU series transducers to maintain reliable readings over a wide range of temperatures. The consistent, accurate performance minimizes routine maintenance and helps eliminate unplanned system shutdowns.
- Modular construction and configurable, renewable electronics that enable interchangeability of internal components provide flexibility, reduce inventory, and make any required maintenance quick and simple.
- All wetted components are 316L VIM-VAR stainless steel and Elgiloy to promote corrosion resistance and clean operation, minimizing component replacement costs through extended service life.
- Genuine Swagelok VCR face seal fitting end connections provide reliable, leak-tight performance, helping to eliminate leakage-related system shutdown.
- The standard transducer enclosure meets Ingress Protection IP65/NEMA4 or IP54/NEMA3, designed to protect internal electronics from moisture and dust.
- No span adjustment is required after zero-point correction, so installation of field-replaceable electronics is quick and simple.
- Low internal volume minimizes dry-down and purge time, helping reduce qualification time.

Operation

The Swagelok PTU series pressure transducer uses metal thin-film sensing technology to measure system pressure. This sensing technology consists of a strain gauge formed on the Elgiloy diaphragm using semiconductor deposition and etching techniques.

As system pressure changes and deflects the sensor, the electrical resistance of the strain gauge changes. The change in resistance is detected, amplified, and converted to a usable electronic output signal. This signal is then sent to output devices that monitor or control system pressure.

Performance Data

Accuracy (Limit-Point Calibration)	≤ 0.5 % of span, limit-point calibration, for pressure ≥ 0 psig (≤ 0.25 BFSL); ≤ 1.5 % of span for pressure ≤ 0 psig (≤ 0.75 BFSL)
Linearity	≤ 0.2 % of span
Hysteresis	≤ 0.03 % of span
Repeatability	≤ 0.05 % of span
Reproducibility	≤ 0.15 % of span
Long-Term Stability	≤ 0.2 % of span per year
Zero Adjustability	±5 % of span
Response Time	≤ 2 milliseconds
Vibration Resistance	10 g in accordance with IEC 770 (vibration under resonance)
Shock Resistance	500 g in accordance with IEC 770 (mechanical shock)
Total Zero-Point Variation^①	≤ 1.5 % of span

① Applies to 1.5 in. modular surface-mount model with W-seal.

Temperature Effects

Temperature Coefficient (TC) of Zero in Compensated Temperature Range	≤ 0.3 % of span per 18°F (10°C)
TC of Span in Compensated Temperature Range	≤ 0.15 % of span per 18°F (10°C)
Compensated Temperature Range	−4 to 176°F (−20 to 80°C)
Ambient Temperature Range	−4 to 185°F (−20 to 85°C)
Storage and Medium Temperature	−40 to 212°F (−40 to 100°C)

Technical Data

Overpressure Limit	2 × full scale to 3000 psig, 250 bar, 25 MPa 1.25 × full scale > 3000 psig, 250 bar, 25 MPa
Burst Pressure	10 × full scale to 500 psig, 40 bar, 4.0 MPa 9 × full scale to 1000 psig, 60 bar, 6.0 MPa 7.2 × full scale to 1500 psig, 100 bar, 10 MPa 4.5 × full scale to 2000 psig, 160 bar, 16 MPa 2.8 × full scale to 3000 psig, 250 bar, 25 MPa 1.8 × full scale to 5000 psig, 400 bar, 40 MPa
Wetted Surface Finish	Electropolished 7 μin. (0.18 μm) <i>R_a</i> avg
Service	Liquid, gas, and vapor
Protection Class	IP65 /NEMA4 or IP54/NEMA3

Electrical and Electronic Data

Dielectric Withstand	500 V (dc) max
Electromagnetic Capability	CE-conformity, EN61326, SEMI E33-94
Electrical Protections	Reverse polarity, short circuit signal
Load Capacitance	0.1 μ F max
Maximum Current Output	< 30 mA (4 to 20 mA signal) < 1 mA (0.1 to 5.1 and 0.1 to 10.1 [dc] signals)

Materials of Construction

Component	Material Grade/ASTM Specification
<i>End connections, body</i>	316L VIM-VAR SS/A479
<i>Diaphragm</i>	Elgiloy/AMS 5876
Housing	300 series stainless steel

Wetted components listed in *italics*.

Models

Modular Surface-Mount Model

Process End Connections

- 1.5 in. modular surface-mount C-seal (IGC® II-compatible)
- 1.125 in. modular surface-mount C-seal
- 1.5 in. modular surface-mount W-seal

Electrical Connectors

- Bendix, 4-pin MIL plug (IP65/NEMA4)
- M12 \times 1, 4-pin circular connector (IP65/NEMA4)
- Direct wire, 1.5 or 3 m flying lead (IP65/NEMA4)
- 15-pin sub-D connector (IP54/NEMA3)
- Tajimi circular connector R03-R6F (IP54/NEMA3)

Output Signals

- 4 to 20 mA
- 0.1 to 5.1 V (dc)
- 0.1 to 10.1 V (dc)

Dimensions

See **Ordering Information**, page 6.

Testing

Every Swagelok PTU series pressure transducer is factory inboard vacuum tested with helium to a maximum leak rate of 2×10^{-9} std cm³/s.

Calibration

Every Swagelok PTU series pressure transducer receives a five-point pressure calibration to ensure proper operation over the designated pressure range. A certificate of calibration is supplied with each transducer.

Cleaning and Packaging

Every Swagelok PTU series pressure transducer is assembled, cleaned, and packaged in a Class 100 cleanroom.

Input Power Supply (Excitation)

- 10 to 30 V (dc) (4 to 20 mA)
- 10 to 30 V (dc) (0.1 to 5.1 V)
- 14 to 30 V (dc) (0.1 to 10.1 V)

Internal Volume

- < 1.5 cm³ (0.092 in.³)

Pressure Rating

- **Positive Pressure**
 - 0 to 500 psig
 - 0 to 40 bar
 - 0 to 4.0 MPa
- **Compound Pressure**
 - 30 in. Hg to 500 psig
 - 1 to 40 bar
 - 0.1 to 4.0 MPa

See page 7 for complete listing of available pressure ranges.

Transducer Ordering Information

Build a Swagelok pressure transducer ordering number by combining the designators in the sequence shown below.

Options

- 13-point pressure calibration traceable to Deutscher Kalibredienst (DKD), German Calibration Service.
- Typical material certification (part number and purchase order number specific).
- Material Mill 3.1B Certification, which provides heat traceability and verifies the chemical and mechanical properties of the wetted components, is available.

M12 × 1, 10 m cable, 90° angled, 4-wire, UL listed ^②	PTU-MC-15

^① UL style 2164/1061, temperature rating 80°C.

^② UL style 20549/1061, temperature rating 80°C.

Digital Display Indicator

A digital display indicator is available to mount directly to the Swagelok PTU series pressure transducer for local and remote indication of pressure.

Features

- Provides LED display of pressure in user-configurable units including psig, bar, kg/cm², kPa, and MPa
- Offers display accuracy of 0.5 % to ± 1 digit to match transducer accuracy
- Uses input signals of milliamps or volts
- Includes two programmable set points (one programmable set point with Bendix connector)
- Displays up to four digits
- Offers choice of front or top display window for viewing flexibility
- Meets Ingress Protection IP65/NEMA 4
- Is loop powered, no extra power supply required

Electrical and Electronic Data

Input Signal

- 4 to 20 mA
- 0.1 to 5.1 V (dc)
- 0.1 to 10.1 V (dc)

Electrical Connectors to Transducer

- Female M12 \times 1, 4-pin circular connector
- Female Bendix, 4-pin MIL plug

Output Signal

- 4 to 20 mA
- 0.1 to 5.1 V (dc)
- 0.1 to 10.1 V (dc)
- Display (LED red), 4 digit, 7 mm digit height
- High and low set points

Power Supply

- 16 to 30 V (dc) for 4 to 20 mA
- 10 to 30 V (dc) for 0.1 to 5.1 V (dc)
- 15 to 30 V (dc) for 0.1 to 10.1 V (dc)

Electrical Protection

- Reverse polarity

Protection Class

- IP65/NEMA 4

Output Electrical Connector

- M12 \times 1, 5-pin circular connector
- Bendix, 4-pin MIL plug
- Direct wire (flying lead)

Cleaning and Packaging

Every Swagelok PTU series digital display indicator is packaged in a Class 100 cleanroom.

Performance Data

Accuracy Display	$< \pm 0.5$ % of span, ± 1 digit
Accuracy Switching Point	$\leq \pm 0.5$ of span ± 1 digit
Zero Adjustment	± 10 % of span
Switching Point Number	2 \times NPN open-collector 1 \times NPN open collector for Bendix MIL plug
Switching Point Function	Normally open/normally closed
Switching Point Adjustment	1 to 99 % of span
Response Time Switch	< 15 milliseconds
Influence of Supply Voltage	< 0.1 % per 10 V
Switching Current	300 mA max
Thermal Error Display	< 0.1 % of span per 18 °F (10°C)
Thermal Error Switches	
Dielectric Withstand	500 V (dc) max
Electromagnetic Capability	CE-conformity, EN 61326, SEMI E33-94; CE declaration of conformity available on request.
Vibration Resistance	5 g: 10 to 2000 Hz
Shock Resistance	No damage up to 100 g

Temperature Rating

Ambient	-22 to 185°F (-30 to 85°C)
Storage	
Compensated Range	-4 to 176°F (-20 to 80°C)

Display

Type	LED, 4 digits
Units	psig, bar, kg/cm ² , MPa, kPa
Refresh Rate	3 times per second
Digit Range	-999 to 6000

Programming

Type	Menu-driven programming via external pushbuttons
Programmable Parameters	Change of measuring units, setting switching points, adjustable decimal point, adjustable measuring range, adjustable zero point

Housing

Material	ABS plastic
Housing Dimensions	1.5 by 1.2 by 1.5 in. max (38 by 29 by 38 mm max)
Top View Model with Electrical Connector	1.5 by 2.0 by 2.6 in. max (38 by 51 by 66 mm max)
Front View Model with Electrical Connector	1.5 by 3.1 by 1.5 in. max (38 by 77 by 38 mm max)

See **Ordering Information**, page 9.

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Caution: Do not mix or interchange parts with those of other manufacturers.

Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.
