

The Swagelok logo is rendered in a white, stylized script font with a registered trademark symbol (®) at the end. It is centered on a dark blue background. In the corners of the image, there are faint, semi-transparent images of Swagelok hydraulic fittings and connectors, showing their hexagonal and cylindrical shapes.

GRAB SAMPLING SYSTEMS

SWAGELOK ASSEMBLY SERVICES

Swagelok London, Türkiye, Caspian offers preconfigured sample systems for both liquid and gas applications. Our systems provide accurate and efficient means for capturing representative gas or liquid samples from pipelines, tanks or systems and transporting them to the lab for analysis.

When looking for standard designs across site or between locations, **high quality products**, one supplier for all your components and short service lead times, we can help you.

Our experienced **Assembly Team** can also work with you to create customised grab sampling modules to meet your exact needs. Our trained engineers have the experience to assist you with the design of your sample system.

They are then assembled locally by our team of **certified technicians** to provide you with the same quality and availability you expect from Swagelok products, also backed by our Limited Lifetime Warranty.

System Types

- Bottle Samplers
- Cylinder Samplers
- Custom Samplers

REGULATOR ASSEMBLIES

SWAGELOK ASSEMBLY SERVICES

At [Swagelok London, Türkiye, Caspian](#) we not only stock standard regulator assemblies, we can also build and test them to order. Using our [high performing](#) “K Series” and “RHPS” regulator ranges, we can produce many different types of assembly or panel. Like our products, our assemblies are backed up by our [Limited Lifetime Warranty](#).

KPR Series (single stage) Regulator Features

- Convoluted, non-perforated diaphragm
- Metal-to-metal diaphragm seal
- Low internal volume
- Two-piece cap design provides linear load on the diaphragm seal
- High flow, dual-gauze type filter positively retained in inlet port

KCY Series (two stage) Regulator Features

- Convoluted, non-perforated diaphragm
- Metal-to-metal diaphragm seal
- Excellent set point stability
- Minimise supply pressure effect (SPE)
- High flow, dual-gauze type filter positively retained in inlet port
