

Something That **STAYS WITH YOU**

As Benjamin Franklin once said:

“An investment in knowledge pays the best interest.”

Thus, for our industry, learning or perfecting a critical mechanical skill can only make you safer and better prepared to overcome any fluid-system application challenge.

EDUCATION IS EVERYTHING

Once you have it – and continually apply it – you have the power to create your future, no matter what your industry.

Enroll in and fully experience our globally renowned, highly interactive, all-day **Swagelok Tube Fitting Installation & Tube Bending Essentials** course, to graduate with the crucial know-how to perform your maintenance tasks more safely, effectively, and confidently – as you help your company achieve ultra-efficient and optimized operations.

You will understand why leakage, of any media, means unnecessary costs, excessive waste and downtime, and, perhaps, even a dangerous workplace. You will **practice, practice, practice** so that you leave class knowing how to precisely pull up a tube fitting and how to accurately bend tubing of different materials and diameters.

We can conduct your training event at your facility or project site – or at our leading-edge, **12-seat Pittsburgh Training Center**. We supply ALL class materials: manuals, consumables, numerous work-related and personal take-home items...even lunch.

IN ADDITION TO OUR Installation & Bending Essentials course, we offer:

- **Advanced Tube Bending (2.5, 3, or 3.5 days...your choice of session length)**
- **Hose Essentials (half-day)**
- **Valve Essentials (half-day)**
- **Process Analyzer Sampling Systems (5 days)**
- **Process Analyzer Sampling Subsystems (5 days)**
- **Sampling Systems Problem-Solving & Maintenance (2 days)**
- **Analyzer Technician Essentials (2 days)**
- **Orbital Welding (5 days)**
- **Steam & Condensate Essentials (2 days)**
- **Materials Science (1 day)**

PEOPLE HAVE BEEN TALKING ABOUT US:

- “The training was put into laymen’s terms; the instructor held my interest the entire day...and the hands-on learning experience was exceptional.”
- “I know now that I can do any bending required in our shop.”
- “This class enabled me to truly understand WHY things are done a certain way, not just HOW.”
- “Talk about learning how to greatly reduce scrap and waste!”
- “I think everyone can gain valuable maintenance insights from this class – no matter what your current skill level.”

Put our team alongside yours
