

40 Series Nameplate Installation Instructions

Kit Contents:

- Nameplate (1)
- Nylon washer (1)
- Instruction Sheet (1)

NOTE: It is important to refer to the exploded view drawing while following the installation instructions.

1. Loosen handle set screw.
2. Note position of handle before removal for use when reassembling. Remove handle and set aside.
3. Remove panel nut and set aside.
4. If mounting valve to a panel, fit valve through properly drilled hole in the panel.
5. Remove the adhesive covering on the back of the nameplate and place over the top of the valve body. Set nameplate in proper orientation and press the adhesive backing against the panel/valve body.
NOTE: Proper nameplate orientation is defined by the valve orientation after installation into system.
6. Place nylon washer over the name plate.
7. Screw the panel nut onto the valve body flush against the washer until snug.
8. Place the handle on the stem. Align the handle set screw with the valve stem flat. Position the handle in the direction noted in Step 2.
9. Torque the set screw as follows:
 - 41/42 Series: 15-20 in. lbs.
 - 43 Series: 30-35 in. lbs.
 - 44 Series: 60-65 in. lbs.
 - 45 Series: 130-135 in. lbs.
